

Earthquake Case Study Project

You are a member of a team that is charged with investigating a past earthquake. Your team shall decide what major Earthquake they want to investigate and research the incident on the internet. You must record all of your websites used for information as references. You are to create a poster, PowerPoint, Prezi, Google Presentation or other similar format on your teams selected earthquake. Your project should include the following information

- When and where the earthquake occurred,
- What plate tectonics were involved
- The magnitude
- How it affected the people of the region
- How it affected the environment
- Lessons learned from the Earthquake
- References, Websites used etc....
- ABOVE ALL YOUR PROJECT SHOULD BE INTERESTING AND CREATIVE!

INCLUDE LOTS OF PICTURES!

Format - use large enough print and colors that can be seen
